

Please postpone any votes on media ownership deregulation. June 2, 2003 is too soon to make a wise decision. If you do vote please do not allow further deregulation. The media monopoly that now exists is because of deregulation. The hard data is abundant and easily interpreted, showing that deregulation is creating monopolies that do not serve the public interest, violate the law, and are extremely dangerous to homeland security. Please do your job as a regulating agency and break up the media monopoly that currently exists, and bring back the 3 year reviews of broadcast media stations to require them to serve the public interest that allows them to use our airways for free. This is wellfair. Lawrence
